

# Art Intent

## Our Intent for our Art curriculum:

Our Art curriculum is designed to meet the content of the National Curriculum. Children are taught about a range of different artists and techniques. Our vision is for all teachers and learners in our school to become expressive artists so that they can develop the skills, knowledge and understanding which enables them to be confident, creative and independent learners.

## Our Implementation for our Art curriculum:

Our Art lessons are based on a big question each half term that links to Geography, History and science. Children will be taught a wide range of artistic skills and techniques such as shading, drawing, colouring, painting, layering and dotting. They will also have access to lots of artwork created by famous artists and each other. Children will also be able to have freedom with creativity and exploring different art techniques. Art contributes to teaching and learning in all curriculum areas and is used throughout the curriculum as well as planned units of work, which can be found in the curriculum long term and medium term plans.

## The impact of our Art Curriculum:

Our curriculum equips children with the skills to become creative. Children will learn key vocabulary and should be able to recall this in everyday life. We aim for children to have a knowledge and understanding of artists and art techniques which will progress throughout school. Children will be able to solve problems and thinking is encouraged. Children will build resilience through their work and are encouraged to learn from their mistakes.
